

Secure Access Service Edge (SASE)

Consolidate Tools

Timus integrates connectivity and security by layering in features often separated.

Easy To Deploy

Pure cloud. No hardware.
Average deployment time of 30 minutes.

Built on Zero Trust

Conditional access via adaptive MFA upon login.
Adaptive user risk profiles.

Connectivity

Always-on, effortless connectivity. Maximum speeds and reliability.

Create Your Software Defined Perimeter

Always-on VPN, inter-site connectivity, lightning speeds,
maximum protection & granular control.

Zero Trust Network Access

Secure remote access defined by behavioral analytics & adaptive MFA.

Dynamic Firewall

Connect to offices or protect SaaS apps through private gateways with a single static IP address.

Threat Prevention

Network level malware engine layered on web filtering rules based on permissions.

Actionable Insights

Dashboard visibility into access logs, threat analytics and identity-based insights.
