

ZERO TRUST NETWORK PROTECTION

Timus SASE: Zero-Click Security for the Modern Workforce

Protect Your Data with Zero Trust Security

Small and mid-sized businesses (SMBs) are prime targets for ransomware, making security and compliance critical. Timus SASE delivers a 100% cloud-based Zero Trust network security solution, ensuring secure, compliant, and uninterrupted access to all data.

Always-On Network Access for Secure Connectivity

Unlike traditional VPNs, the lightweight Timus SASE agent is always-on, enabling encrypted access to company network with zero-clicks on the users' part.

Advanced Cyberthreat Protection

Protect your business from cyber attacks with Cloud Firewall, Secure Web Gateway, real-time malware and phishing protection, and dark web monitoring.

Regulatory Compliance Made Simple

Timus SASE allows deep visibility into network activities combined with robust reporting. This can help you get to your compliance goals like PCI-DSS, HIPAA, SOC 2 Type 2, and ISO 27001 faster, ensuring data protection and regulatory adherence.

Rapid and Easy Deployment

Timus SASE can be fully deployed in 30 minutes or less without the need for additional hardware. Easily deploy, manage and scale Timus SASE.
