IT Budget Saving

"Fantastic! The team is amazing, and the product is great. I have setup and used a few other SASE products over the last 2 years, and Timus, with their combo of people and product, has edged out the other products."

Marlo Alexander Owner, Bosque IT

Timus SASE: Built for MSPs

Your three biggest challenges — solved with one scalable platform.

Zero Trust Network Access

Secure every user, everywhere — without the hassle of VPNs

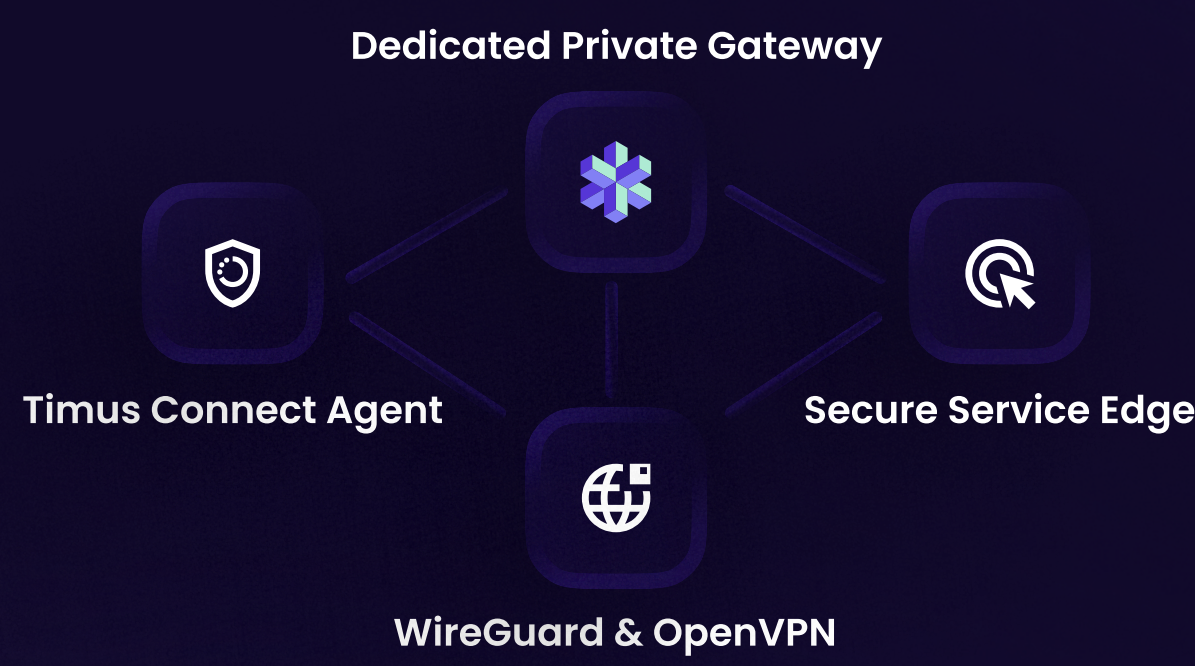

- Always-on, passwordless agent
- Phishing & malware protection on every session
- Identity-based policies that follow users
- Global gateways for seamless connection

Complete **Control** for MSPs

Control who gets in, and what they can do

- Role & risk-based access policies
- Quarantine non-compliant devices
- Shadow IT visibility
- Centralized policy management

Insights that Prove Value

Become your clients' strategic security partner

- Live analytics on access, risk, & usage
- Compliance-ready reports (HIPAA, SOC2, GDPR)
- Trend reporting & scheduled delivery

Security Doesn't Have to Be Complicated

Your clients work from anywhere. Their data lives everywhere.
Timus delivers protection that adapts to your business without slowing it down.
Contact us today to see how we make security simple.
