

ZERO TRUST NETWORK PROTECTION

## Accelerate MSP Business Growth with Timus SASE

Timus Networks' mission is to protect companies from data breaches and ransomware wherever their employees are working from. With Timus SASE, we simplify network security and access for SMEs to significantly reduce business risks and bolster compliance.

Always-on, Zero Trust Network Access

Adaptive Cloud Firewall on a Dedicated Gateway

Protect your SaaS Apps behind a Static IP address

Secure Web Gateway for Safe Browsing, and Compliance

## Simplify Network Security for SMEs & Deploy in 30 minutes

### SMEs are grappling with challenges like:

- Too many IT and security tools
- Global network access from many locations
- Different devices and OSs
- Increasing numbers of resources and connections
- Ever-evolving sophistication in phishing

**Timus SASE streamlines the needs of SMEs** through a single, unified solution.

Deploy Timus SASE in **30 minutes or less** to create a cloud-based security perimeter that follows users anywhere—whether they're working from home, in the office, at a conference, or traveling.

## The “Now” of Access and Network Security for SMEs

Network security is no longer optional for SMEs—it is *essential*.

**With Timus SASE in your stack:**

### Business Owners

gain peace of mind, knowing their networks are secure and compliant.

### Employees

can focus on their work without constant security concerns – wherever they are.

## Business Drivers for MSPs

### Recurring Revenue Growth

SASE is a low-hanging fruit for MSP owners to drive business growth and recurring revenues. Gartner predicts that almost all new secure access solutions deployed will be SASE, and most VPNs will be replaced by mid 2026

SASE helps reduce support tickets by unifying multiple tools into a single solution. One Partner reduced their support tickets by 30%.

### Reduced Support Tickets

### Operational Efficiencies

SASE drives operational efficiencies by streamlining multiple tools under a single solution with centralized management.

Deep visibility into clients’ networks and usage from a single platform, with no blind-spots in security

### Centralized Management

### Compliance

SASE helps with compliance for both MSPs and their clients reducing liability

## Business Drivers for MSP Clients

### Easier Compliance

Deep visibility into network usage and access.

No security gaps; seamless, always-on usage means no blind spots.

Easy to use means less friction actually to use the solution.

### Improved Usability

Enabling a hybrid workforce with consistent policy, irrespective of user location.

Modernize and reduce friction with a single seamless solution that unifies network security.

### Mitigate Business Risk

Zero trust access to systems, applications.

Fewer incidents mean more time to respond to threats.

Protect from phishing.

Unified and stronger security posture for the business.

## Timus SASE: Example MSP Case Study

### Challenges: Struggled to find a comprehensive remote Access solution for SMBs:

#### Before

- Wasn't easy to use and deploy
- Couldn't scale easily
- Complicated pricing

#### Today

- Deploy in less than 30 minutes
- Easy-to-manage
- Simple per-user pricing

**20%**

reduction in annual IT budgets due to security tool consolidation

**30%**

drop in support tickets

**<1**

avg number of days to deploy and setup Timus

## MSP Success Stories: Hear from Our Partners

### Ian Miller

Engineering Manager,  
Brightworks Group

"The team and product from Timus Networks is top-notch. We evaluated a number of other SASE/ZTNA solutions and vendors, but none are as comprehensive, fast, or easy to deploy as Timus."

### Bryan Little

COO, Rayne Technology  
Solutions

"The overall experience with Timus has been solid. From general support to providing feedback that has been already incorporated into the product."

### Brandon Jones

Owner,  
Attitude IT

"Users are happier and we have far less remote access related tickets than before. And the ones we do have, are normally a user education issue, and we have not experienced any downtime with Timus."

### Chris Fisco

Director of Technical Services,  
Krantz Secure Technologies

"The team at Timus is awesome and is always available. It's refreshing to work with a vendor who cares and engages as much as Timus does."

## About Timus Networks:

Timus Networks simplifies network security and access for SMBs and mid-market enterprises helping to significantly reduce business risks and bolster compliance. Our premier product, Timus SASE, transforms complex setups involving multiple tools into a single, unified solution that secures networks and protects users, regardless of their location or device.

Developed by firewall experts with decades of cybersecurity experience, Timus SASE is purpose-built for the MSP/MSSP Channel. It offers simplicity and rapid deployment for modern network needs, with installation in under 30 minutes.
