

Timus Drives Client Satisfaction & Operational Efficiencies

Layer Your Security Offering

Timus SASE adds a critical layer of network security to all users across all business verticals. From performance to ease of use, and with our %100 MSP Channel go-to-market approach, everything Timus does is with MSPs in mind.

Mitigate Business Risk & Enforce Compliance

86% of data breaches occur due to stolen credentials. Timus SASE's always-on VPN layered with ZTNA makes sure the connections are always secure, and the access is only granted after a thorough identity check - wherever the users are located.

Create Maximum Visibility & Network Control

Remote users accessing SaaS apps directly provide IT Techs insufficient network visibility and control. Having users access critical business resources through a single static IP address enables maximum control, and granular access control.

Drive Operational Efficiencies & Reduce Support Tickets

Deploying and managing Timus SASE is simple for both users and admins and always-on agent removes user friction to use the solution. Less support tickets for staff mean more time to focus on the real threats.

Timus Minimizes Business Risks and Enforces Compliance

Decrease Support Tickets

Secure, always-on connectivity for users drives lower ticket inflow to the service desk versus legacy VPNs.

Increase MRR

Timus is built to be easily implemented within the layered security offering, and comes with simple user-based subscriptions.

Consolidate Tools

Timus SASE makes it easy to consolidate tools into a single SKU: VPN, MFA, web filtering, dark web monitoring, productivity tracking, and more.

Streamline Access and Network Security

Timus SASE enables streamlined access management, and cloud-based network security, built to keep users connected and protected.

Why Timus Networks?

Timus is 100% dedicated to the MSP Channel. We strive to excel in what we do, and we fit nicely into your existing security stack.

High-Touch Implementation & Technical Support

Complimentary one-on-one configuration guidance & a dedicated team of technical support staff are ready to assist you.

Get Started Pain-Free

You can always cancel within the first month even for annual subscriptions.

Timus is committed to enabling MSPs with a multi-pronged approach through each stage in our partnership. Timus's mission is to partner and grow with you.
