ZERO TRUST NETWORK PROTECTION

Timus SASE (Secure Access Service Edge)

Consolidate Tools

Timus integrates connectivity and security by layering in features often separated.

Easy To Deploy

Pure cloud. No hardware. Average deployment time of 30 minutes.

Built on Zero Trust

Conditional access via the richest set of ZTNA checklist in the market with adaptive MFA based on user risk profiles.

Always-On Access

Enforce compliance to security with always-on VPN layered with ZTNA.

Create Your Software Defined Perimeter

Always-on VPN layered with ZTNA, inter-site connectivity, lightning speeds, maximum protection & granular control.
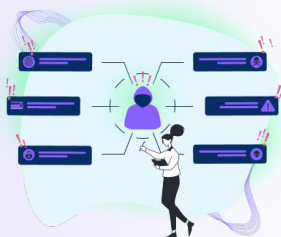

Zero Trust Network Access

Secure remote access defined by behavioral analytics & adaptive MFA.

Dynamic Firewall

Connect to offices or protect SaaS apps through private gateways with a single static IP address.

Threat Prevention & Safe Browsing

Network level malware engine layered on URL-based web filtering rules based on permissions.

Actionable Insights

Deep network visibility and dashboards into access logs, threat analytics and identity-based insights.
